

Haflinger Technik Ltd

Pinzgauer 710 & 712 Workshop Vehicles

These vehicles were originally supplied by us in 2002 / 3 and were converted for use by an emergency & rescue service. All were based on very good quality rust free ex military vehicles and have been fitted with bespoke hardtop bodies with roller shutter doors, shelving, lighting and a host of extras. They have been well serviced / maintained and little used since the conversions were done. All are in excellent mechanical & cosmetic condition, UK Registered, and will be supplied with an MOT.
