BETRIFFT:

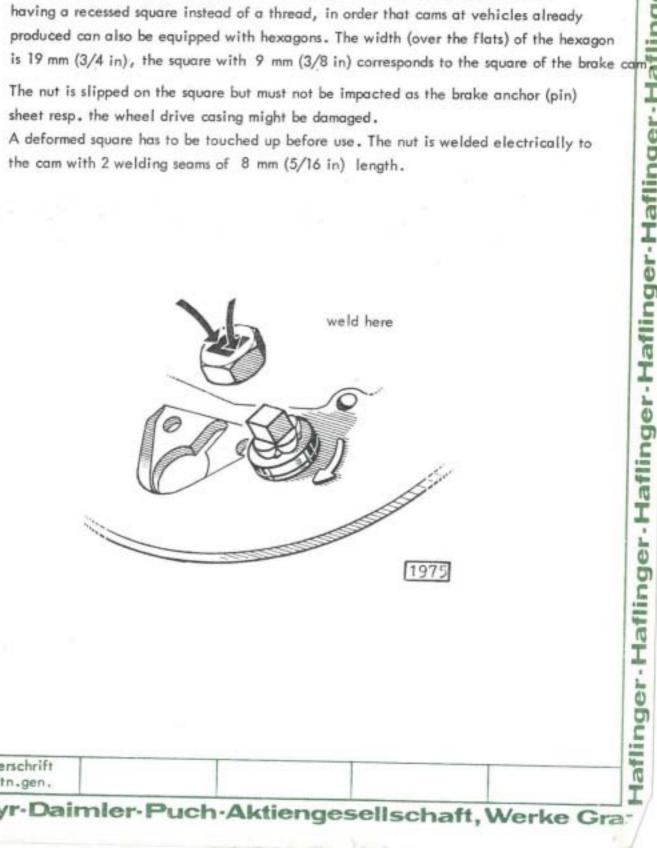

Brake cam with hexagon

KD/Fr/br

In order to enable easier adjustment of the brake the square of the brake cam is replaced by a hexagon screw of 19 mm (3/4 in) width.

From April 1967 all vehicles will be equipped with these new brake cams.

Our spare parts department will supply a hexagon nut Part no. 700.1.34.027.1 having a recessed square instead of a thread, in order that cams at vehicles already produced can also be equipped with hexagons. The width (over the flats) of the hexagon
